EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Norman Roth on October 12, 2007.

The application has been amended as follows:

Claim 27:

A medical connector having a longitudinal axis and comprising:

interconnected axially aligned relatively rotatable parts forming a housing with a fluid flow passageway in said housing, said parts being configured for connection to external male and female Luer flowline connectors;

a compressible seal in said housing having a flow passageway extending from an axially aligned end to an axially offset end whereby relative rotation of said parts opens and closes a fluid flow path through said connector; and said seal including a retrograde flow preventer positioned in said fluid flow path, said seal and said retrograde flow preventer being integrally-formed as a single piece on said compressible seal and said retrograde flow preventer projecting toward a male end of said male Luer connector, said preventer having a resilient portion with a normally closed fluid conducting perforation in said resilient portion which opens at fluid delivery pressures exerted on an interior surface of said resilient portion and which remains closed at patient vascular pressures exerted on an exterior surface of said resilient portion.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The subject matter of the independent claims could either not be found or was not suggested in the prior art of record. The subject matter not found for claim 27 was a medical connector with a compressible seal that has a retrograde flow preventer on the seal and being formed as a single one-piece uniform structure. The retrograde flow preventer prevents fluid from flowing in the wrong direction in the medical connector.

The independent claims also include other patentable subject matter in combination with the other elements or steps of the claim not mention in the above paragraph.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew F. DeSanto whose telephone number is 571-272-4957. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nick LUCCHESI can be reached on (571) 272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
